Players, start the engines! Overview This product is very easy to use I Love It Wed, 5 December 2018 | Review: Munashe m Awesome Wheel Guys.... I just like Did this review come in handy? Yes (2) | No (6) My review Sun, 1 Seed 2019 | Review: Frederickpro Steering Wheel Doesn't Have a 180-Degree Turn Have This Review Been Useful to You? Yes (0) | No (0) This is from Stone Age Sat, 21 Dec 2019 | Review: Isaki D I bought this thing and I regret it. I was supposed to go to the G29. It does not vibrate (tested in American Truck Sim and Euro Truck Sim | other games like WRC7 do not see it), it is not seen by many games. The center of spring is too rigid and sounds clunky when centered. I think that only vibrates if you're playing '80s tetris. It's only ideal if you just want to use the steering wheel instead of the controller, but it's plastic-ky too. He's sliding off the table if you drag or drag him too much.... All in all, I give him a zero of five Was this review useful to you? Yes (0) | But (0) My Review Sat, May 16, 2020| Review: Muhammad A no review Was this review useful to you? Yes (0) | But (0) © 1996-2014, Amazon.com, Inc. or its subsidiaries it's time to put control in your own hands! The speed wheel 3 MTRacing Wheel is so realistic that once you wrap your arms around a rubber-coated steering wheel and experience intense vibrations, you'll feel like you're really on the road! The sequential rod gearbox is mounted on the wheel to play racing games either in AT (Auto-Transmission) and Manual Transmission mode. With 14 programmable buttons that include 4 gearbox buttons behind the wheel and 2 MT Stick buttons, you can easily set up more of the hot keys needed in racing games. Mini stick is turned on for display changes; The Speed Wheel 3 MT has four suction cups to keep you stable when you get excited and the acceleration and braking pedals make your driving experience real. Players, start the engines! Compatible with the PC gaming system for all your favorite racing games Vibration feedback works to feel all the bumps, car handling and collisions like in real life! The rubberized wheel feels great in your hands. Mini stick included for changes to the action buttons display on the front panel to change the horn or display, just like the real driving experience.
